

## Step 3: Creating the MX1508 Device in EAGLE

1. Open the Library window again and choose Device . Name the device MX1508.
2. Add the symbol by clicking  Add. Select MX1508 and left click to place it at the origin. Hit escape and close the pop up window.
3. Click New in the bottom left and add the package.
4. Click connect in the bottom left and connect all the pins to the corresponding pads.

5. Click Description and add a short description for our device
